- Student photo galleries and list makers (\$1000)

Host on your existing server or pServer in your School.

Advantages of using pServer (from \$5,000 depending on server selected)

- We arrange direct VNP access to pServer for easy maintenance but we do not see your network
- pServer virtual server functionality is preinstalled at our workshop and only needs to be married to the school network. Almost plug and play. Hence minimal setup costs and no impact on your servers. Significant savings.
